PRIDINOL tablets (Myopridin®) for central and peripheral muscle spasms

The Pan Mersey Area Prescribing Committee does not currently recommend the prescribing of PRIDINOL tablets (Myopridin®) for central and peripheral muscle spasms.

GREY

Pridinol is indicated for central and peripheral muscle spasms in adults, including lumbar pain, torticollis and general muscle pain.[1]

This recommendation will be reviewed if a formal application for use is received and prioritised for in-year review.

In the meantime, clinicians should continue to follow national guidance, local pathways and local formulary choices for the treatment of central and peripheral muscle spasms.

- NICE Pathway: Musculoskeletal conditions (last updated: 20 November 2020)
- NICE Clinical Knowledge Summary: Neck pain - acute torticollis (September 2018)
