The Pan Mersey Area Prescribing Committee does not currently recommend the prescribing of OXYCODONE with NALOXONE modified release tablets (Targinact[®]) for restless legs syndrome

This recommendation will be reviewed if a formal application for use is received and prioritised for in-year review.

Prescribers should continue to follow existing guidance for the treatment of restless legs syndrome. A [Clinical Knowledge Summary](#) is available that details the recommended management options for people with this condition.

Note: Patients who are not eligible for treatment under this statement may be considered on an individual basis where their GP or consultant believes exceptional circumstances exist that warrant deviation from the rule of this policy. In this situation, follow locally defined processes.
